Skills

Languages: Java , JavaScript , Python , SQL

Backend: Spring Boot , REST APIs

Frontend: React.js , HTML ,CSS

Database: MySQL , PostgreSQL , MongoDB

Tools: Git , Docker , AWS

Projects

AI-Powered Job Application Tracker | Jun 2026 – Present

- Developed a job tracking platform to manage applications, interviews, and job status.
- Built secure authentication and role-based access using JWT.
- Designed REST APIs for job management and application tracking.
- Integrated AI features for resume analysis and job recommendations.
- Containerized the application using Docker for deployment.

Technologies: Java, Spring Boot, MySQL/PostgreSQL, JWT, Docker, REST APIs, Git/GitHub

BitChats – Real-Time Chat Application | Jan 2024 – Apr 2024

- Developed a real-time chat application with private and group messaging.
- Implemented secure user authentication and authorization.
- Built real-time communication using WebSockets.
- Designed responsive UI and integrated REST APIs.
- Stored chat history using MySQL/MongoDB.

Technologies: Java, Spring Boot, React.js, MySQL, MongoDB, WebSockets, REST APIs, Git/GitHub

AI-Powered Employee Attrition Prediction System

Jan 2026 – Feb 2026

Developed an AI-powered employee attrition prediction system that analyzes workforce data to identify employees at risk of leaving, enabling organizations to take proactive retention measures and reduce hiring costs.

- Built a machine learning model using **XGBoost** to predict employee attrition with over **85% accuracy** ○ Utilized the **IBM HR Analytics dataset (1400+ records, 35+ features)** for training and evaluation. ○ Performed data preprocessing including handling missing values, feature encoding, and normalization ○ Conducted feature importance analysis to identify key factors influencing employee turnover.
- Designed a system capable of providing early insights to HR teams before employee resignation.
- Improved decision-making by enabling data-driven retention strategies.
- Demonstrated results through visualization and performance metrics.

Technologies Used: Python, XGBoost, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Fake News Detection System | Feb 2026 – Mar 2026

- Developed a Flask-based web application for fake news detection.
- Trained an NLP model for real-time text classification.
- Implemented secure user authentication using Supabase.
- Applied text preprocessing and feature extraction techniques.
- Integrated frontend and backend using REST APIs.

Technologies: Python, Flask, Supabase, NLP, Scikit-learn, HTML, CSS, JavaScript

Licenses & certifications

- Introduction to Computers and Operating Systems and Security - **Coursera** **Dec – 2023**
- Computational Thinking for Problem Solving - **Coursera** **Dec- 2023**
- c++ programming – **Cisco Networking Academy** **Apr- 2024**
- Design and Analysis of Algorithms - **NPTEL** **July –Sep 2025**

Education

MIT ADT University, PUNE, India	2023 - 2027
• B Tech –Information Technology- CGPA: 7.66	
Mahatma Ghandhi College	2022 - 2023
• Maharashtra State Board of Secondary & Higher Secondary Education Percentage: 63%	
J.C High School Karanja Washim	2020-2021
• Maharashtra State Board of Secondary & Higher Secondary Education Percentage: 69%
