PROJECT DETAILS

- 1. AI-Powered Employee Attrition Prediction System**
[Tech Stack: Python · Flask · XGBoost · SHAP · SMOTE · Pandas · Scikit-learn · Data Visualization](#)
 - Trained ML models on HR Analytics dataset; implemented feature engineering and predictive analytics for employee attrition risk scoring.
 - SHAP explainability surfaced overtime, job satisfaction & tenure as top attrition drivers; enabled 3× faster HR intervention.
 - Developed REST API endpoints and batch CSV engine for HR review; integrated cohort-level analytics and dashboard-ready reporting.
- 2. bit-chats – Decentralized Secure Messaging App**
[Tech Stack: Rust · Bluetooth Mesh Networking · P2P Systems · End-to-End Encryption · Tor \(Arti\)](#)
 - Serverless offline-first P2P messaging via Bluetooth mesh multi-hop relay — works in zero-connectivity environments.
 - End-to-end encrypted messaging pipeline with secure key handling; Tor anonymity layer for enhanced privacy.
- 3. FitSync – Fitness & Diet Recommendation Platform**
[Tech Stack: React · Node.js · Express.js · MongoDB · REST APIs · Authentication · Data Visualization](#)
 - Full-stack health-tech platform with personalised workout/calorie recommendations, macro analytics, and goal tracking.
 - Secure authentication, mobile-optimised dashboards, and complete backend architecture with REST APIs.
- 4. EduStake – College Resource Sharing Platform**
[Tech Stack: JavaScript · Node.js · Express.js · MongoDB · REST APIs · Role-Based Access Control](#)
 - Centralised academic platform for sharing study materials, notes, and assignments; structured by course, semester, and topic.
 - Role-based access control, contributor moderation, upload/approval workflows, and usage analytics dashboard.
